

Solar Electric Installation

Renaissance Charter School

Fast Facts

Installation Completed: May 2006

Location: Jackson Heights, NY

System Size: 45 ft²

System Power: 510 Watts

Application: Power for Greenhouse

This project was completed for the Salvadori Center (salvadori.org), a non-profit organization specializing in math, science and engineering education, in association with Solar Energy Systems and SunWize Technologies. The Bright Power system provides the students at the Renaissance School with solar energy that they can study, use, monitor and enjoy.
